Office Action Summary

Art Unit: 1711

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 8-11, 15, 16, 18, 19, and 21-46 drawn to an aqueous composition, classified in class 524, subclass 801.
 - II. Claims 47-52, 54-56, and 58-71, drawn to a method of preparing a coated substrate, classified in class 427, subclass 207.1.
 - III. Claims 77-82, 84-86, and 88-97 drawn to a method of preparing cellulosic products, classified in class 524, subclass 35.
 - IV. Claims 98-106, 108-115, 117, and 118 drawn to a method of forming a coating, classified in class 427, subclass 226.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product such as a PU.

Art Unit: 1711

3. Inventions III and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product such as a PU.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Stephen M. Roylance on 09/05/01 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Art Unit: 1711

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sam A. Acquah whose telephone number is (703) 308-2436.
